

Fast repair of all electric and electronic parts

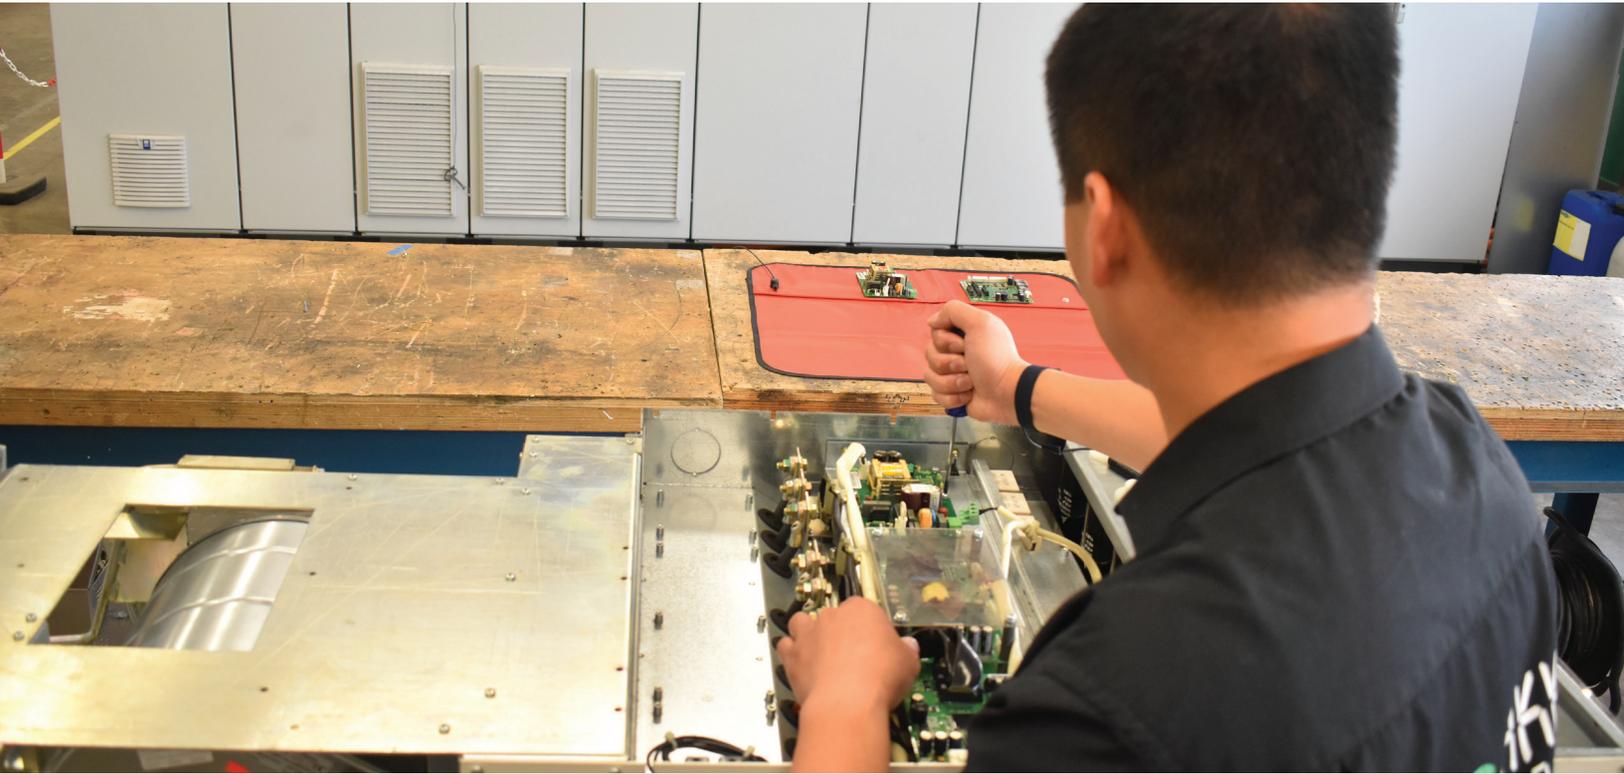

A defective part in your installation can have a huge impact on your operation. It is impossible to keep spare parts of all the components in your installation. At the same time a long delivery time of a new component can lead to extra downtime costs. In those cases, repair of defective parts is the best solution to get operations online again quickly.

Limit your downtime by fast parts repair

Bakker Sliedrecht is your reliable partner for the repair of a wide range of electric and electronic parts. With our 24/7 parts repair service we can limit the impact of the disruption by the faster delivery of your repaired part. To decline the downtime even more, it is also possible to send a service technician to the site. With our extensive knowledge and certified, experienced technicians we can repair parts to extend the lifetime of your system.

Bakker Sliedrecht repairs all brands and types of electric and electronic parts, including:

- ✓ Frequency drives (ABB, Danfoss, Schneider, Siemens, Vacon)
- ✓ Switches/breakers (low-and-high voltage)
- ✓ Resistors
- ✓ Displays
- ✓ Printcards
- ✓ LCL filter
- ✓ Circuit breaker

Single point of contact for parts repair of all manufacturers

Bakker Sliedrecht repairs frequency converters, switches, resistors and displays in a specialized repair workshop. With our extensive knowledge and good relationships with the original manufactures, we can repair all electric and electronic parts of all manufacturers. Hereby we provide you a single point of contact for the repair of all your parts. We are certified and trained to repair parts of all well-known brands. Before delivery, your (low-and-high voltage) parts are tested to meet the original equipment specifications and the current component standards to ensure the reliability of your system.
