

Consultancy for optimizing your operational performance

Are you in need of an expert?

Are you experiencing difficulties with your electrical systems when operating with specific configurations? Do you want to decrease emissions or energy consumption? Are you looking for a second opinion on works done by third parties? Or maybe you are wondering if you are compliant with all relevant legislation? Whatever your goal may be, Bakker Sliedrecht has a broad team of experts that like to employ their knowledge to help you optimize your operational performance.

Bakker Sliedrecht will take care of:

- ✓ We calculate the return on investment and total cost of ownership (TCO)
- ✓ Solve even the most complex issues with our proven concept
- ✓ Experienced and well trained MSc and BSc experts
- ✓ Experience with various industries
- ✓ Development and implementation of solutions

Multi-disciplinary team of experts

All our experts have years of experience in their field of expertise, such as system architecture, power distribution, automation, and legislation. Our experts are early adapters in their field of expertise. The experts of Bakker Sliedrecht are well acquainted with various industries and have worked in all stages of production, like R&D, engineering, and providing service. This gives them a clear view on what the consequences of a proposed change are for your entire system, thereby optimizing your operations.

Wide range of consultancy services

Bakker Sliedrecht offers a wide range of consultancy services. For example, we are experienced in creating technical tender specifications that are based on your functional wishes and demands.

Our clear specifications eliminate grey areas, reducing the costs of extra work during project execution. We can also independently evaluate if system improvements, that were implemented by third parties, such as fuel consumption reduction, truly deliver their proposed performance.

Our experts follow a proven concept with a baseline assessment, gap analysis and studies to solve every challenge. Together, we will develop and implement the improvements to your system until you are fully satisfied.

Bakker Sliedrecht has expertise in the field of:

- ✓ System architecture
- ✓ System integration
- ✓ Creating technical specifications for tenders
- ✓ Legislation
- ✓ Fault level studies
- ✓ Power Distribution
- ✓ Emission reduction
- ✓ Energy optimization
- ✓ Process automation
- ✓ Harmonic distortion
- ✓ Load analysis
- ✓ Protection analysis
