

Bakker Sliedrecht developed the vessel management system BIMAC especially for marine application. Our vessel management system enables you to achieve maximum performance. It improves your control with automated responses to events and provides insight in your installations' history. BIMAC's modular structure with add-ons enables us to match the level of complexity you desire. The system is user-friendly because the intuitive layout of the system is designed according to your preferences. Moreover, you are free to manage general settings yourself.

### Highlights

- ✓ Alarm management
- ✓ Manage all main and auxiliary functions
- ✓ History logging / trending function
- ✓ Redundant system
- ✓ Modular structure matches any level of complexity
- ✓ Compliant with all relevant classification agencies
- ✓ BIMAC uses off-the-shelf, type approved, hardware components
- ✓ User friendly thanks to custom lay-out with intuitive design
- ✓ Manage general settings yourself:
  - ✓ i/o points
  - ✓ Alarm messages
  - ✓ Authorizations

### Add-ons

- ✓ Online assistance / remote monitoring
- ✓ Reporting
- ✓ Power management
- ✓ Alarm Service
- ✓ Exhaust gas monitoring
- ✓ Remote diagnostics
- ✓ Tank level monitoring
- ✓ Ballast system
- ✓ Watch responsibility
- ✓ Engineers alarm
- ✓ NMEA interfacing e.g. Voyage Data Recorder / GPS etc.
