

## Certified management of high voltage installations

### Safe high voltage installations

As an owner of high voltage installations, you want to offer your employees and customers a safe environment. A lot of organizations are unaware that the European NEN-EN 50110-1 regulation (the Dutch NEN 3140 and NEN 3841 regulations) requires you to have a nominated person that manages your high voltage installations. This person has to be NEN-EN 50110-1 certified, which requires thorough education and periodic training. In case you are not compliant, you are responsible for all consequences of a breakdown, such as injuries and damage. Moreover, your insurance may not cover damage without prove that you are compliant.

### Bakker Sliedrecht will take care of:

- ✓ Management of your high voltage installations
- ✓ Designation of responsibilities
- ✓ All safety aspects
- ✓ Modification management
- ✓ Preventive maintenance
- ✓ 24/7 Corrective maintenance

## Certified management of your high voltage installation

Do you have someone in your staff that is NEN-EN 50110-1 certified? Bakker Sliedrecht has certified engineers (the Dutch installatieverantwoordelijke and werkverantwoordelijke) that can take over the responsibility of your high voltage installations. As a single point of contact, they will manage all aspects of your installation. In this way, we ensure that your high voltage installations are safe to use, and that you are compliant with all relevant legislation.

You will benefit from knowing your maintenance costs in advance while saving valuable time and high costs on the continuous training of your own staff. Moreover, by outsourcing the responsibility of your high voltage installations to an expert, you will maximize your businesses continuity while being able to focus on your core business.

### Benefits Installation management:

- ✓ Ensure the safety of your high voltage installation
- ✓ Improve your business continuity
- ✓ Maintenance costs are known in advance
- ✓ Single point of contact for your HV installations
- ✓ Save time and costs on training your own staff
