

Tailor-made LV switchboards

Bakker Sliedrecht designs, assembles and integrates high quality low-voltage switchboards. The designs of the low-voltage switchboards are made by our highly skilled engineers and are matched fully to the demands of your system. With our modular system, the switchboards will be designed to fit within the dimensions of your installation environment. Bakker Sliedrecht supplies tailored made switchboards with fast delivery times against competitive prices. All applicable safety standards are taken into account. We offer freedom of choice by integrating components from all well-known manufacturers. Our experience as an electrical system integrator enables us to match the switchboards to the other systems of your electrical installation.

Key features

- ✓ CTO Configure to Order
- ✓ Tailored to your application
- ✓ Modular system
- ✓ Brand independent

Switch boards are much more than stand-alone products. We have in-house expertise & experience of all crucial contextual phenomena:

- ✓ Short circuit calculations
- ✓ Arc flash calculations
- ✓ Selectivity calculations
- ✓ Harmonic calculations
- ✓ Define and adjust protection relays settings

Safety

IEC 61439 compliant
 IEC 61641 criteria 1-7
 Approval by Classification Societies
 Tested up to 100kA/1.000MS

Product values up to:

Rated operating voltage 1.000V
 Busbar rating 6.300A
 Short circuit test Icw 120kA

Our services for switchboards

- ✓ Consultancy
- ✓ Engineering
- ✓ Delivery
- ✓ Installation
- ✓ Commissioning
- ✓ Maintenance
- ✓ Modifications
